

Accessibility Conformance Report

(Based on VPAT® Version 2.4)

Name of Product/Version: Guidebook mobile application and Guidebook Web

Report Date: March 2022

Product Description: Our mission is to make it simple to create and manage mobile apps. While we've had a lot of success powering conference apps, corporate meeting apps, and university campus apps, our platform has been used for thousands of different use cases.

Contact Information: support@guidebook.com

Notes: The general rule is that Guidebook is accessible because it uses the native accessibility function of the parent device (like VoiceOver for iOS). The vast majority of our product is accessible, however there are a few things that are not compliant. All critical functionality is accessible for end users.

Evaluation Methods Used: VoiceOver and native accessibility tools built into iOS software for mobile devices and computers. Voice Assistant and native accessibility tools built into Android 9 software.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:
